Ironhack AI Consulting

Final Project

Marco Martins
Change Activist : : Career Transition Coach

You worked hard to get here.
Now the hardest part begins.

From now on,
Every professional conversation is a pitch!

The hardest part isn't learning AI.
It's knowing where you fit now.

Know who you are. Know where you fit.
Walk in ready.

I built this for you.

AI Career LaunchPad
Built for your transition.

Here is what changes for you.

- ① It understands **who you are**
- ② It matches you to **where you belong**
- ③ It prepares you to **get there**

Stage 1: Career Compass

- LinkedIn profile
 - Clifton Strengths report
 - Self-reflection report
- 

□ Career Compass
(Career Path Recommendation)

It understands **who you are**

Stage 2: Job Search Engine

- Career Compass
 - Job (Gig) Search form
- 
- Job (Gig) Match

It finds **where you belong.**

Stage 3: Application Engine

- Career Compass
- Job Description

- Job Fit Report
- Draft Cover Letter
- Interview Questions

It prepares **you to get there.**

Who You Are In The AI World

You are the professional who has spent 25 years mastering safety-critical systems and now applies that rigorous expertise to AI governance, implementation, and strategy. Your transition into AI consulting is grounded in a rare combination of technical depth and strategic foresight, particularly suited for regulated industries.

Your Career Reframe

Your career as an Electronics Engineer and Corporate Training Manager is not merely a past chapter but a foundation for your AI consulting role. The neural networks for welding parameter optimisation at Cranfield University and decision support logic in HMI design at Bosch Car Multimedia exemplify your early application of AI principles. Building the Atmel Academy demonstrates your capability to scale educational initiatives, a critical skill for AI enablement.

OVERALL FIT SCORE

86

strong fit

You possess the necessary skills and experience to excel in this role, particularly in designing and delivering training programs. Your background in technical learning and your ability to communicate complex topics effectively align well with the job requirements.

Closest Career Compass profile: AI Trainer and Enablement Specialist · **Confidence:** strong

This JD requires strong skills in designing and delivering hands-on training, workshops, and bootcamps, which aligns closely with the candidate's experience in building and leading Atmel Academy, a global technical learning platform. The JD also emphasizes the need for clear communication of complex topics, a strength of the candidate as evidenced by their communication skills and experience in technical learning.

Your extensive experience in building global learning platforms and your ability to translate complex AI concepts into accessible training materials uniquely position you to excel as an AI Enablement Specialist at SAP.

AI Career LaunchPad
Built for your transition.

Who It's For

Anyone breaking into AI Consulting.
From any background. At any stage.

Thumbs up if **you** want in.

Problem-Solution fit?

Problem: You finished the bootcamp.
You still don't know how to talk about yourself.

Solution: Know who you are. Know where you fit.
Walk in ready.

Alternative: Generic CV tools. Career coaches
without AI context. None of them understand this
transition.

Before we talk money, **here is what I stand for.**

My AI Manifesto

Do no harm. Always.

Human enhancement over human replacement.

Human judgement over automated decisions.

Critical thinking over blind automation.

Transparency over convenience.

Privacy over data hunger.

Wellbeing over efficiency.

Positive impact over impressive technology.

The Business Case

One system.
Three use cases.

The Business Case

One system. Three use cases.

① AI Consultants (out of the bootcamp)

As career transition service

② Ironhack like AI bootcamp providers

As complement of career services

③ Career Transition Coaches

License to use

The Business Case: Staged Launch

	Month 0-6	Month 6-12	Month 12 - 36
Coaching Practice	 Live	 Running	 At Capacity
Bootcamp Operators	 Building	 First License	 4 Operators
Coach Licensing	—	 Building	 3-8 Coaches

The Business Case: Initial Investment

	Cost
Builder time (opportunity cost)	€8,000
GDPR + legal + compliance	€3,500
Design + marketing + launch	€3,500
Tools + infrastructure	€800
Total cash investment	€7800
Running costs	€100 month

The Business Case: Revenue Streams

	Coaching Practice	Bootcamp Operators	Coach Licensing
Setup fee (income)		€1,000/operator	€500/coach
Year 1 income	€19,200	€3,300	€0
Year 2 income	€19,200	€23,000	€7,500
Year 3 income	€19,200	€23,000	€21,700
Cumulative yr 3	€57,600	€49,300	€29,200
Time to ROI	6 months		

The Risk

Every risk has a mitigation.

Top 3 Risks & Mitigation

Risk	Mitigation
AI over-inflates candidate confidence	Mandatory gaps + transparency notice on every report
OpenAI dependency — pricing or deprecation	Other models available as backup
GDPR non-compliance	Session only data (at POC) Legal review before MVP

Compliance

Built to be deployed.
Not just demonstrated.

Compliance

	Status
EU AI Act	Limited Risk — transparency obligations only
GDPR	90-day retention. Consent mechanism. DPA templates for operators and coaches.
Data Processing	OpenAI API DPA. n8n EU-hosted.
Human oversight	Advisory outputs only. No automated decisions.

The Roadmap

This is day one.
Here is where it goes.

The Roadmap

- ① Alpha Testing live. Feedback.
 - ② Full three-stage pipeline complete.
 - ③ MVP Integrated coaching sessions.
- Commercially ready.

Go To Market

One product.
Three markets.
One flywheel.

Go to market

① Coaching Practice Direct.

I am the product. My network gets me the first clients.

② Bootcamp Operators Free pilot cohort.

No licence fee until outcomes proven. Then expand.

③ Coach Licensing Coaches

Referrals. Inbound only. No sales call needed.

Clients become proof. Proof opens operators.
Operators produce coaches.

I didn't build this to pass a project.

I built it because I need it —
and so does **everyone in this room.**

Next Steps

The next step is a **30-day pilot** with one cohort.

Maybe you?
