Who you are in the AI world

You are the professional who has spent 25 years in safety-critical systems and now applies that rigor to AI governance, implementation, and strategy. Your unique blend of technical expertise and strategic thinking positions you as a leader in AI enablement and learning design.

Your career reframe

Your early application of neural networks for welding parameter optimization at Cranfield University demonstrates your long-standing engagement with AI techniques. This, combined with your experience in developing rule-based systems for safety-critical automotive contexts, positions you as a credible advisor in AI governance and compliance. Your work in decision support logic for HMI design at Bosch Car Multimedia further underscores your ability to translate complex data into user-friendly interfaces, a crucial skill in AI consulting.

What makes you rare

- You are a safety-critical systems engineer who built a 5000-user global learning platform and applied neural networks in 1997.
- As an Agile and Scrum coach, you led a team from 7 to 22 members in automotive HMI systems, demonstrating your ability to scale teams and processes.
- Your expertise in rule-based systems and decision support logic for safety-critical applications sets you apart in AI consulting.

Your Clifton Strengths — deployed for this transition

Futuristic

Strategic Thinking

Deploy now

Your ability to vividly imagine and articulate future possibilities energizes others and sets you apart in interviews and client meetings, making you a compelling visionary.

Learn & explain AI

Your Futuristic strength helps you quickly grasp emerging AI trends and envision their future applications, making it easier to explain complex AI concepts to non-technical stakeholders.

Watch out

If unmanaged, your focus on future possibilities can lead to neglecting present details, which may cause you to overlook immediate opportunities or requirements during the transition.

Ideation

Strategic Thinking**Deploy now**

Your fascination with ideas and ability to generate innovative solutions gives you a unique edge in identifying novel approaches to AI challenges during consulting engagements.

Learn & explain AI

Your Ideation strength allows you to connect disparate AI concepts and create new frameworks, making it easier to communicate complex ideas to clients.

Watch out

Your constant generation of new ideas can become overwhelming if not managed, leading to a lack of focus and difficulty in prioritizing during the transition.

Strategic

Strategic Thinking**Deploy now**

Your ability to quickly identify patterns and devise strategic plans is a significant advantage in navigating the complexities of a career transition and positioning yourself effectively.

Learn & explain AI

Your Strategic strength helps you map out learning paths and anticipate future AI trends, enabling you to stay ahead and explain strategic implications to clients.

Watch out

If unmanaged, your tendency to overanalyze can lead to decision paralysis, slowing down your transition process.

Communication

Influencing

Deploy now

Your ability to articulate ideas clearly and persuasively is a key differentiator in interviews and client presentations, helping you stand out as a communicator.

Learn & explain AI

Your Communication strength enables you to translate complex AI concepts into relatable stories, making them accessible to non-technical audiences.

Watch out

If unmanaged, your focus on storytelling can lead to overemphasizing narrative over substance, potentially causing misunderstandings during technical discussions.

Positivity

Relationship Building

Deploy now

Your contagious enthusiasm and ability to uplift others create a positive atmosphere in interviews and team settings, making you a memorable candidate.

Learn & explain AI

Your Positivity helps maintain morale and motivation when learning challenging AI concepts, encouraging others to engage with the material.

Watch out

If unmanaged, your optimism can lead to underestimating challenges, potentially causing you to overlook risks during the transition.

Your Elevator Pitch — 10 seconds to grab attention

AI SUGGESTION — MAKE IT YOURS

"I help automotive and manufacturing leaders design and implement AI learning experiences that are actionable and scalable so they can integrate AI into their operations with confidence and precision."

I help

Automotive and manufacturing leaders

do what

design and implement AI learning experiences that are actionable and scalable

so they can

integrate AI into their operations with confidence and precision

This is a starting point. The best elevator pitch is the one you genuinely own. Try saying it out loud — if it does not sound like you, change it until it does.
