Energy vs Performance

High energy + High performance

- Running AI enablement workshops and designing learning programs.

High performance + Low energy

- Detailed project administration and status reporting.

High energy + Still developing

- AI workflow automation with n8n.
- Career architecture and transition strategy consulting.

Target roles that allow for creative problem-solving and innovation, such as AI Trainer and Enablement Specialist, while avoiding those that require extensive repetitive tasks or bureaucratic processes.

The Concerns You Named — Addressed

"Tendency to go deeper than the slot allows."

Clifton strength to deploy

Communication — This strength helps in structuring presentations to ensure clarity and conciseness.

Bridge the gap

Communication

Practice timing presentations to fit within the allocated slot while maintaining depth.

Strategic, Communication

Use Strategic and Communication to outline key points that must be covered within the time limit.

**Positivity**

Seek feedback from peers on presentation timing and adjust based on their input.

*"That the market sees the career transition and defaults to offering a junior or mid-level role because the AI experience is new — discounting 25 years of senior engineering, global learning platform management and client-facing technical work. The concern is being mispriced, not being unqualified."*

**Clifton strength to deploy**

Strategic — This strength helps in positioning oneself effectively in the market to highlight unique value.

**Bridge the gap****Strategic**

Develop a portfolio showcasing past achievements and AI projects to demonstrate senior-level capability.

**Communication, Futuristic**

Leverage Communication and Futuristic to craft a narrative that connects past experience with future AI roles.

**Positivity**

Network with industry leaders to gain endorsements that reinforce senior-level positioning.

*"Safety-critical systems experience means I understand what it costs when AI fails in a regulated environment — not theoretically, but from years of working to standards where failure means liability, injury or death. A recent graduate cannot replicate that. It makes me a credible AI compliance and governance advisor in automotive, manufacturing and any regulated sector."*

**Clifton strength to deploy**

Futuristic — This strength helps in envisioning and communicating the future impact of AI governance in regulated industries.

**Bridge the gap****Futuristic**

Create case studies that highlight the impact of past safety-critical work on AI governance.

**Ideation, Strategic**

Use Ideation and Strategic to develop innovative AI governance frameworks that draw on past experience.

**Communication**

Host webinars or workshops on AI compliance to establish authority in the field.

## SWOT Analysis

### STRENGTHS

- Your ability to design scalable learning ecosystems for AI, as demonstrated by Atmel Academy.
- Strategic Thinking that helps you map out learning paths and anticipate future AI trends.
- Communication strength that enables you to translate complex AI concepts into relatable stories.
- Your experience in safety-critical systems engineering, providing a foundation for AI compliance advisory roles.

### WEAKNESSES

- Limited direct experience in AI-specific training content creation.
- Potential lack of exposure to the latest AI tools and platforms used in training.
- No direct experience in measuring AI training effectiveness.

### OPPORTUNITIES

- The growing demand for AI enablement and learning design in organizations scaling AI adoption.
- AI compliance and governance consulting for regulated industries, leveraging your safety-critical systems experience.
- Roles that require innovative problem-solving and autonomy, aligning with your career anchors.

### THREATS

- The potential for the market to misprice your transition, offering junior roles despite your senior experience.
- The fast-paced evolution of AI tools may outpace your current exposure if not addressed.
- The risk of being perceived as lacking direct AI-specific experience in training and integration.
