Day 1 action: Sign up as an Alpha Tester for AI Career LaunchPad

[Sign up as alpha tester →](#)

Your Next Steps

You are in an active search with a direct path strategy, meaning actions should be precise and focused on building momentum quickly.

DAY 1

Sign up as an alpha tester for the AI Career LaunchPad program to gain early access and feedback opportunities.

This action leverages your existing involvement with LaunchPad and sets the stage for showcasing your AI enablement skills.

→ Confirmation of participation in the AI Career LaunchPad as an alpha tester, beginning to gather insights and feedback.

DAY 7

- Rewrite your LinkedIn headline to read: 'You are the professional who has spent 25 years in safety-critical systems and now applies that rigor to AI governance, implementation, and strategy.'
- Reach out to three former colleagues or clients in automotive and manufacturing

DAY 30

- Develop a case study on AI compliance and governance for regulated industries, focusing on automotive applications.
- Enroll in a certification course relevant to AI governance or compliance to strengthen your credentials.
- Schedule and conduct at least two informational interviews with leaders in AI

to discuss potential AI enablement opportunities.

- Draft a post for LinkedIn highlighting your recent work on the AI Career LaunchPad and your niche in AI training and governance.

Milestone: Your LinkedIn profile reflects your new positioning, and initial outreach has been made to key contacts in your network.

training and compliance to gather insights and expand your network.

Milestone: You have a completed case study, are enrolled in a certification program, and have expanded your network with industry insights.

DAY 60

Secure at least one speaking engagement or workshop facilitation on AI compliance in a regulated industry.

- Submit proposals to speak or facilitate workshops at relevant industry conferences or events.
- Leverage your network to identify opportunities for speaking engagements or workshops in AI compliance.

DAY 90

Secure your first paid AI training or consulting engagement.

- Finalize a proposal for a potential client in automotive or manufacturing, focusing on AI training or compliance.
- Follow up with all contacts made in the last 90 days to explore consulting opportunities.

Certifications

Add one domain-specific certification as a complement.

Priority certification

IAPM Certified Agile Project Manager

IAPM

This certification is ideal for you as an AI Trainer and Enablement Specialist, validating your skills in agile methodologies crucial for leading AI projects.

AI compliance

Certified Information
Privacy Professional (CIPP)
by IAPP

AI compliance is essential for your niche in regulated industries, ensuring you understand privacy and data protection laws.

AI governance

Certified AI Governance
Professional by AI
Governance Institute

Strengthening your understanding of AI governance will enhance your credibility in consulting roles.

Safety-critical AI

Safety Critical Systems
Engineering by University
of York

This area is crucial to your background and will support your positioning in safety-critical AI applications.

Deep Dive

Books

Books on AI governance frameworks and the legal architecture of high-stakes regulated industries — focus on authors writing at the intersection of engineering liability and algorithmic accountability.

Understanding these frameworks will enhance your ability to design AI systems that meet regulatory standards.

Articles

Trade press and policy publications covering EU AI Act implementation, GDPR enforcement decisions, and AI risk classification in automotive and manufacturing — look for practitioner-authored pieces, not academic surveys.

Staying informed on regulatory changes will help you advise clients accurately and confidently.

Self Paced

AI ethics and compliance courses on platforms like Coursera or edX

These courses will deepen your understanding of ethical AI practices, aligning with your niche in compliance and governance.

Build Your Own Lab

Develop a pilot AI governance framework for a hypothetical automotive company, focusing on compliance with the latest EU regulations.

This hands-on project will showcase your ability to create practical solutions in AI governance, reinforcing your expertise.
