

AI Enablement Specialist (f/m/d)

Company: SAP

Location: Garching bei München, Germany (Hybrid)

Employment Type: Regular Full Time

Travel: 0–20%

Posted: March 9, 2026

About the Role

We are seeking an AI Enablement Specialist to design and deliver hands-on AI learning experiences that empower employees across SAP to effectively understand, design, develop and use AI solutions. This role bridges technical expertise with enablement, creating practical training that enables business innovators, citizen developers, and technical business users to confidently integrate AI capabilities into their work.

What You'll Do

- Design and lead workshops and bootcamps with real-world exercises
 - Build AI prototypes, demos, and reference implementations
 - Create interactive lab environments for safe experimentation
 - Develop tutorials, implementation samples, and technical documentation covering model integration, prompt optimisation, and best practices
 - Work with subject matter experts to ensure content reflects current AI capabilities
 - Guide users as they implement AI features, help resolve issues, and optimise solutions
 - Foster communities of practice and promote knowledge sharing among AI practitioners
 - Continuously improve learning content based on feedback
-

What You Bring

- Master's degree in Computer Science, Data Science, Information Systems, or related field
- Strong passion for business processes
- Good programming skills in Python or similar languages

- Experience integrating AI services and working with APIs
 - Proven ability to design and deliver hands-on trainings, workshops, or bootcamps
 - Clear communication of complex topics in English (German is a plus)
 - Proactive problem-solving and practical guidance capability
 - Ability to work effectively across technical and business teams to drive AI adoption
-

The Team

Join SAP's Enterprise AI Centre of Excellence — where innovators shape, govern, and scale AI. We drive the latest AI solutions, empower colleagues worldwide, and set the standard for responsible, enterprise-ready AI.

Requisition ID: 447839
